

Director, Medical Affairs (Diabetes)

- ☑ High Profile Assignment
- ☑ Princeton, NJ Based
- ☑ Excellent Career Opportunity
- ☑ Best-in-Class Clinical Development
- ☑ Rewarding Opportunity
- ☑ Outstanding Medical Affairs Team
- ☑ Potential to make a difference in the field of Diabetes

OUR CLIENT is an \$8 Billion global pharmaceutical leader in the field of diabetes care, hemostasis management and growth hormone and hormone replacement therapy among others. The organization's mission is to innovate solutions to improve the health of people with diabetes by using its impressive technology platform.

You Will Join a dynamic medical affairs team focused on treatment solutions supporting and driving its Diabetes platform and treat unmet medical needs in this therapeutic area as the company manages a rich and impressive platform of drugs.

Defined as an opportunity to lead and make a dramatic impact, our client is looking for a leader with passion to provide strategic and clinical direction creating and communicating clear, shared visions leading to customer focused messages and strategies supporting education and market share expansion. Further, this individual will assist in the conduct of late stage Phase IIIb/IV clinical projects and provide scientific expertise both internally and externally with key opinion leaders, academic institutions, managed care organizations and the community at large. If you are looking for an opportunity to be a key medical advisor and promote customer-focused clinical strategies with an innovative pharmaceutical company, this opportunity is for you!

GENERAL REQUIREMENTS

- ⇒ MD with sub-specialty in Endocrinology, Diabetes and Metabolism;
- ⇒ A minimum of 5 years combined experience in small/large pharma, clinical practice and/or academic setting with research experience in the field of endocrine and metabolism;
- ⇒ Experience working with academic centers and investigators for clinical trials;
- ⇒ Demonstrated understanding of medical affairs and Phase IIIb/IV clinical programs a plus;
- ⇒ Ability to organize and achieve project milestones; a successful track record managing within a matrix organization;
- ⇒ Effective communication skills; ability to develop and manage medical/scientific community experts, fostering relationships with key opinion leaders and the community at large.
